EcoCALC

EC240

- Large 8 digit LCD display
- Durable hard keys
- Easy to use spacious key pad
- Made from Recycled Plastic
- 4 Constants

The EC240 is part of Aurora's EcoCalc range. Made from recycled plastic, with recycled packaging, it is manufactured using ISO14001 compliant procedures and is totally solar powered and requires no battery. An excellent calculator with an environmentally friendly message.

EMU-1 Emulator Software

This CD-ROM software will run on a PC and when combined with an interactive whiteboard and projector will beam a large working replica of the calculator onto the whiteboard.

This giant working calculator is viewable to the whole class and it is also identical to the calculators being used by the students. The whiteboard calculator makes it much easier to demonstrate a calculation and also makes it much easier for the students to follow the keystrokes and calculation chain. The emulator is simple to operate and easy to use and has been designed to integrate into an existing lesson plan with minimal fuss providing a simple to use, practical and fun solution.

The emulator is protected by copyright and licensed for use on a single site basis and can be used by an unlimited number of users on the site. The software can be installed on an unlimited number of PC's on the site or downloaded onto a server and made available across the site's network.
