

CK50 Class Pack

AX-501

- 10 Digit single line LCD display
- A total of 131 functions
- Slide on protective hard case
- Complex Number calculations
- Number Base conversions

The CK50 is a convenient class pack of 30 x AX-501 calculators packed into a Grathnells extra deep storage tray, it includes a foam stacking insert that holds the calculators securely and allows for easy stock checking when distributing or collecting the calculators. There is also a clear plastic lid for secure transport and to protect the calculators during storage. The Grathnells storage tray is compatible with Grathnells' storage systems commonly used in schools.

The AX-501 is a great value for money entry level scientific calculator featuring a clear 10 digit LCD display, a very durable and robust case, and a total of 131 functions including Complex Number calculations and a very useful BIN/HEX/OCT/DEC base conversion function.

The CK50 is a great class pack of exam compliant scientific calculators that can be distributed to the whole class or used as an ideal back up set of calculators during examinations.
