

CK61 Class Pack

Contains:

- 30 x AX-595PK calculators ideal for KS3/KS4.
- A blue extra deep Gratnells storage tray.
- Compatible with Gratnells' storage systems.
- A clear plastic lid for secure storage.
- A foam stacking insert for stock counting.
- EMU-2 calculator emulator software.
- Dimensions: 340x465x295mm
- Weight: 6.8kg
- Barcode: 6925781416564

AX-595PK

- TrueView® Dot Matrix Display
- TrueLogic® Algebraic Entry
- A total of 254 Functions
- LCM, GCD and I-Div functions
- Slide on protective plastic case

The AX-595PK has a TrueView® dot matrix display, which is great for displaying fractions and mathematical operators exactly as you would find them in a textbook. Combine this with TrueLogic® Algebraic entry and you have a great calculator suitable for use on all UK exams, that permit the use of calculators.

EMU-2 Emulator Software

This CD-ROM software needs to be installed on a PC or server. When combined with an interactive whiteboard and projector a large working version of the calculator is beamed onto the whiteboard. (The AX-595TV will be shown on screen as illustrated.)

This giant working calculator is viewable to the whole class and works exactly the same as the calculators being used by the students. The whiteboard calculator makes it much easier to demonstrate a calculation and also makes it much easier for the students to follow the keystrokes and calculation chain. The emulator is simple to operate and easy to use and has been designed to integrate into an existing lesson plan with minimal fuss providing a simple to use, practical and fun solution.

The emulator is protected by copyright and licensed for use on a single site basis and can be used by an unlimited number of users on the site. The software can be installed on an unlimited number of PC's on the site or downloaded onto a server and made available across the site's network.
